

KYAW THUREIN THAUNG

ODOO TECHNO-FUNCTIONAL CONSULTANT

Al Ain, UAE · +971 55 646 6863 · kyawthureinthaung40@outlook.com
github.com/ZetriSofu40 · kyawthureinthaung.com

PROFESSIONAL PROFILE

Odoo techno-functional consultant with more than four years of ERP implementation, custom development, business-process analysis, rollout, and production-support experience. I work across Odoo 14–19, including projects, accounting, expenses, invoicing, payroll, HR, logistics, and operational workflows. I connect stakeholder requirements with Python, PostgreSQL, XML, QWeb, JavaScript, reporting, integrations, security, AWS deployment, and user adoption.

SELECTED ACHIEVEMENTS

- **Project and accounting workflows:** Connected project expenses, agreement expenses, petty cash, client invoices, vendor bills, retentions, payment vouchers, and customized management reporting.
- **Complex payroll implementation and stabilisation:** Built separate labor and staff payroll engines and resolved recurring run failures across attendance, work entries, salary rules, project costing, accounting, reports, scheduling, and UAE WPS/SIF.
- **Cross-functional development:** Delivered recruitment, employee lifecycle, hardware request and custody, approvals, compliance, document, API, and operational-reporting workflows.
- **Product and production ownership:** Designed the Pillar OS product direction and supported delivered systems through diagnosis, controlled fixes, report corrections, upgrades, and user verification.

PROFESSIONAL EXPERIENCE

Odoo Developer & Support · EL RACE CONSTRUCTION & GENERAL CONTRACTING (UAE)

JUL 2024 — PRESENT

Techno-functional delivery across projects, accounting, expenses, invoicing, payroll, HR, integrations, reporting, and support.

- Developed and maintained custom Odoo addons and workflow enhancements across a connected Odoo 14 environment.
- Developed project and agreement expense controls linking petty cash, supplier costs, client invoices, vendor bills, retentions, and payments to the correct project context.
- Customized accounting forms, validations, payment and receipt vouchers, post-dated-cheque outputs, project summaries, audit views, PDF documents, and Excel reports.
- Implemented payroll, recruitment, employee lifecycle, hardware custody, approvals, documents, APIs, and production-support improvements.

Odoo ERP Implementation & Support · SMEI, Myanmar

SEP 2021 — FEB 2024

End-to-end implementation and user support from requirements through adoption and continuous improvement.

- Gathered requirements and translated business processes into Odoo configuration, implementation decisions, and tailored improvements.
- Supported data preparation, testing, deployment, user acceptance, training, documentation, and operating manuals.
- Provided ongoing maintenance, troubleshooting, updates, and practical guidance for users after go-live.

PROJECTS & QUALIFICATIONS

SELECTED WORKFLOWS & PRODUCTS

- **Import & Export Workflow** · ODOO 19 + AWS
Owned requirements, process design, development, UAT, deployment, and support for freight jobs, shipment documents, costing, purchasing, invoicing, payments, profitability, and reporting. Deployed Odoo on AWS with Docker, PostgreSQL, and Nginx.
- **Project Cost & Accounting Workflow** · ODOO 14
Developed project and agreement expenses, petty-cash links, client-invoice and vendor-bill customization, retentions, payment and receipt vouchers, PDC outputs, project summaries, audit views, and custom PDF/Excel reports.
- **Payroll & Workforce Workflow** · ODOO 14
Built separate labor and staff payroll engines using attendance, timesheets, leave, overtime, salary rules, project costing, accounting, reports, and UAE WPS/SIF; resolved recurring monthly-run failures.
- **Recruitment & Employee Lifecycle Workflow** · ODOO 14
Delivered manpower requests, approvals, applicants, assessments, offers, onboarding, employee documents, transfers, promotions, renewals, contracts, and clearance.
- **Hardware Request & Custody Workflow** · ODOO 14
Developed request, approval, procurement, acknowledgement, custody, transfer, return, repair, loss, damage, disposal, clearance, and reporting controls.
- **Compliance Document Workflow** · ODOO 19
Built document ownership, expiry monitoring, reminder policies, renewal traceability, access roles, dashboards, protected history, and tests.
- **Pillar OS Platform** · PRODUCT PLATFORM
Designed the shared Workspace and product-family direction spanning Pillar HR, POS and Accounting prototypes, Odoo and Flutter integration, product controls, testing, and production-readiness planning.

SKILLS BY PROFICIENCY

- 01 · **PYTHON & ODOO ORM** Advanced — models, business logic, computed fields, automation, tests, and module architecture
- 02 · **ODOO FUNCTIONAL CONSULTING** Advanced — requirements, fit-gap analysis, configuration, workflows, roles, UAT, and training
- 03 · **XML, QWEB & SECURITY** Advanced — views, reports, access rights, record rules, PDF output, and XLSX reporting
- 04 · **POSTGRESQL & SQL** Strong — data analysis, troubleshooting, migration support, and performance investigation
- 05 · **JAVASCRIPT & APIS** Strong — JavaScript, REST, JSON-RPC, external services, and mobile integrations
- 06 · **CLOUD & DEPLOYMENT** Working proficiency — AWS, Docker, Linux, Nginx, Git, GitHub, and production support
- 07 · **FLUTTER** Foundational — mobile integration, client-side debugging, and API consumption
